4. FIRST AID MEASURES**Aspiration pneumonia hazard:** May be fatal if swallowed and enters airways**Eye:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.**Skin:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.**Ingestion:** If swallowed, IMMEDIATELY call a poison control center or doctor for treatment advice. DO NOT give any liquid to the person. Do not induce vomiting unless told to do so by a poison control center or a doctor. Never give anything by mouth to an unconscious person.**Inhalation:** Remove affected person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.**Self protection of the First Responder:** Remove all sources of ignition. Use PPE as required.**Note to physicians:** Contains petroleum distillates—vomiting may cause aspiration pneumonia. Fore skin effects, a highly efficient therapeutic agent for Pyrethrin/Pyrethroig exposure is topical application of tocopherol acetate (Vitamin E).**5. FIRE FIGHTING MEASURES****Suitable (and Unsuitable) Extinguishing Media:** Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. Caution: Use of water spray when fighting fire may be inefficient.**Specific hazards arising from the chemical:** No information available.**Hazardous combustion products:** hydrogen chloride, carbon monoxide, carbon dioxide (CO₂).**Specific Protective Equipment and Precautions for Fire-Fighting Instructions:** In the event of fire and/or explosion do not breathe fumes.**6. ACCIDENTAL RELEASE MEASURES****Personal Precautions, Protective Equipment, and Emergency****Procedures:** Remove all sources of ignition. Evacuate personnel to safe areas. Ensure adequate ventilation, especially in confined areas. Keep people away from and upwind of spill/leak. Use personal protective equipment as required.**Environmental precautions:** If spilled, prevent further leakage or spillage if safe to do so. Prevent product from entering drains. See Section 12 for additional ecological information.**Methods and Materials for Containment and Cleaning Up:** Prevent further leakage or spillage if safe to do so. Cover powder spill with

plastic sheet or tarp to minimize spreading. Dike far ahead of liquid spill for later disposal. Dam up. Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust). Pick up and transfer to properly labeled containers. Soak up with inert absorbent material.

7. HANDLING AND STORAGE

Precautions for Safe Handling: Ensure adequate ventilation, especially in confined areas. Keep away from heat, sparks, flame and other sources of ignition (i.e., pilot lights, electric motors and static electricity). Take precautionary measures against static discharges. Use spark-proof tools and explosion-proof equipment. All equipment used when handling the product must be grounded. Use with local exhaust ventilation. Use personal protective equipment as required. Avoid contact with eyes. Avoid breathing vapors or mists. Contents under pressure. Do not puncture or incinerate cans. Do not stick pin or any other sharp object into opening on top of can. For more information, see product label.

Conditions for Safe Storage, Including Any Incompatibilities: Keep tightly closed in a dry and cool place. Keep in properly labeled containers. Keep containers tightly closed in a cool, well-ventilated place. For more information, see product label.
