

# CYNOFF® INSECTICIDE DUST

## Taking proven control to new heights.

For years, PMPs have chosen the Cynoff® brand for powerful cleanout control of cockroaches and a multitude of other pests, even under extreme pest pressure. To enable our customers to deliver powerful control where liquids and aerosols aren't ideal, FMC Professional Solutions has enhanced Cynoff with an innovative new active ingredient and transformed it into the convenience of a dust formulation.

Introducing Cynoff insecticide dust, engineered to deliver quick kill and lasting residual against crawling insect pests. Cynoff dust represents the next generation of Cypermethrin: **Zeta-Cypermethrin**. Four times more powerful than original Cypermethrin, Cynoff dust offers a variety of advantages over competitive products:

- Requires less active ingredient to be effective
- Works faster than Cypermethrin and other dust formulations
- Provides longer, more stable residual

## Enduring Protection

Cynoff insecticide dust withstands the elements to provide lasting protection against pests.

Better Environmental Stability	Half-Life (Days)	
	Soil Photolysis	Soil Exposure
Zeta-Cypermethrin (Cynoff® Dust)	165.0	27.6
Cyfluthrin (Tempo® Dust)	5.0	11.5
Deltamethrin (DeltaDust®)	34.7	24.2

## Maximum Versatility

Indoors, Cynoff dust penetrates deep into cracks, crevices and voids, leaving a long-lasting barrier against crawling pests like bed bugs, cockroaches and spiders. Outdoors it can be used as a residual treatment in areas where pests such as carpenter ants and stinging insects may invade a structure. Overall, Cynoff dust eliminates over 40 pest species through desiccation, digestion and contact.

## Pests Controlled

- Ants, including Imported Fire Ants and Arboreal Ants
- Bed Bugs
- Carpenter Bees
- Cockroaches
- Crickets
- Earwigs
- Firebrats
- Fleas
- Ground Beetles
- Millipedes
- Silverfish
- Slugs
- Sow Bugs
- Spiders
- Termites
- 17 different stored product pests
- 18 different ornamental plant pests

## Convenient and Easy-to-Use

While some dusts can be a clumpy mess, Cynoff dust is engineered for superior flowability, so it's non-clumping with good float properties. It produces no unpleasant odor and does not leave stains, so you can treat confidently both indoors and out.

Cynoff dust is available in a unique 16-oz plastic squeeze container that can be used as an applicator/hand duster, with no mixing or hand loading required. This reduces the chance of product spillage and worker exposure. An adjustable flow control nozzle helps you customize your application and eliminate waste. If you desire to use your existing dust applicator, Cynoff dust can be transferred easily into any hand or power duster without spillage or airborne plumes.

## Optimize Your Approach

An integral part of your IPM program, Cynoff dust delivers high-powered, long-lasting control where other products can't — and stands up in tougher conditions than other top-performing dusts. Intelligently designed to require less active ingredient and reduce product waste, Cynoff achieves control that's as efficient as it is effective. Arm yourself with the next era of Cynoff pest protection: Cynoff insecticide dust.
