

YOUR GO-TO SOLUTION FOR FLEAS NOW GOES AFTER BED BUGS, TOO.

Order now during our special August promotion and save.

Prescription Treatment® Alpine® Flea Insecticide with IGR is specially formulated to avoid soaking carpets while providing long-lasting protection from fleas. Plus, it's pressurized to help you efficiently and quickly control fleas for your customers.

The IGR pyriproxyfen kills hatching eggs for up to seven months, while Prallethrin provides fast knockdown of flea populations. And with the Reduced Risk* active ingredient dinotefuran, PT Alpine Flea Insecticide protects over the long term. Each 20-oz can covers a treatment area of 2,625 square feet, giving you exceptional value for your business and bottom line.

See why this powerful insecticide is emerging as the leading product in flea control!

Save with our August promotion. CALL YOUR DISTRIBUTOR TODAY.

PT Alpine Flea Insecticide with IGR
20-oz cans x 12 cans/case

SAVE \$18.00 on each case

PT Alpine Flea now has added versatility: BED BUG CONTROL

- Kills bed bugs by contact for fast relief.
- Apply where bed bugs harbor or are suspected of traveling.
- Treat the perimeter of the room at the wall/floor junction, behind, under and/or inside furniture, upholstered furniture, headboards, wall coverings and box springs.
- Luggage: Direct product into pockets, seams, folds and around wheels of empty luggage.
- Treat the perimeter of the area or room where items are stored.

The fast action of PT Alpine Flea Insecticide plus IGR is a perfect complement to the long residual action of Phantom® insecticides for a simple one-two approach for controlling bed bugs.
