

Bait in Spring

Save \$1 Off Per Carton

May 1, 2018 through June 30, 2018

DominAnt® is a super sweet liquid formula that ants love! Ants will abandon almost virtually any food source for DominAnt. Just snap open a bait station and place it near trailing ants. Place multiple stations to open multiple feeding paths into the colony. Ants take DominAnt back to the nest and feed the colony, killing the colony and the queen. Spring is a great time to bait because you never know when the weather will warm up and foraging activity will increase. With DominAnt, you are ready when they are – preventing those call backs.
