

The Advantage Flying Insect Trap®

WE'RE BLUE NOW...

Research by university scientists and the American Journal of Bio-science have confirmed that a UV blue color attracts more flies, 3x more than any other color.

COST EFFECTIVE - PERMANENT & DISPOSABLE

Don't throw your money away on disposable traps. Advantage Flying Insect and Yellow Jacket Traps offer economical benefits of a re-useable trap with the cleanliness & simplicity of disposable liners. A winning combination of permanent & disposable.

EASY TO USE

Disposable liners are the key to simplicity. Simply mix water and Fly Banquet Fly Attractant in the disposable liner. When liner is full of dead flies, remove it and throw away. Insert a new loaded liner and it's ready to work again.

CHIMNEY EFFECT: HOW IT WORKS...

Top and bottom entry holes allow ample access into the trap by flying insects while also creating a chimney effect - pulling in air, moving through trap and back out. Circulation of air also keeps temperatures from becoming too hot for insects to enter. No electricity... Just good physics!

FLY BANQUET -POWERFUL ATTRACTION

Advantage Fly Banquet is a highly attractive lure for a wide variety of flies: stable flies, blow flies, house flies, sludge flies, blue/green bottle flies, large gnats, etc. It is an attractant, not an insecticide and is EPA exempt. Environmentally friendly!

ITEM #	PACKAGING:	WT (LB)
