## Long-Lasting Control That's Right On Target

**Demon® WP** insecticide has been an industry leader to control pests indoors and outdoors, including clean-out of residential and commercial non-food handling areas. Its fast-acting formula continues to work long after the job is done, for powerful results that last.

### NOWHERE FOR PESTS TO RUN

The strength of Demon WP lies in its long-lasting residual activity on a variety of different surfaces. Its versatile and easy-to-use formulation provides Pest Management Professionals (PMPs) with a proven, effective solution for pest infestations.

- Low concentration of the active ingredient, cypermethrin, required for control
- Crack-and-crevice or spot treatment approved for both indoor and outdoor use
- Provides control on both penetrable and impenetrable substrates
- Water-soluble packets eliminate measuring and dissolve quickly
- Cost-effective with long-lasting residual activity
- No objectionable odor
- Has shown no sign of permanent staining when tested on a variety of different indoor surfaces

### BROAD USE, LOW RATES, QUICK KNOCKDOWN

Despite its low use rates, you will see pest knockdown and control in less than one hour. Demon WP is especially efficient for cockroach control, as knockdown occurs even faster in insects that ingest the insecticide while grooming themselves.

While Demon WP is particularly effective against cockroaches and spiders, it is also labeled for the control of 20 other pest species, including ants, centipedes, fleas, mosquitoes, bees, wasps and ticks.

### APPLICATION

Indoors, Demon WP should be applied as a crack-and-crevice or spot treatment. Outdoors, Demon WP can be applied as a broadcast treatment by pump-up or power sprayer up to a maximum height of three feet on surfaces of buildings, porches, screens, window frames, eaves, patios and other areas where pests are found. Test a small area first according to label directions to verify that the paint or siding finish will not be affected. Demon WP can also be used on lawns, ornamental trees and shrubs around residential, institutional, public, commercial, agricultural and industrial buildings; and parks, recreational areas and athletic fields.

### GOOD THINGS COME IN CONVENIENT PACKAGES

You can find Demon WP in convenient, water-soluble packets that eliminate measuring. Just drop them into water, and when the unique packaging dissolves, you're ready to work. The wettable powder dissolves quickly in water for an ideal suspension that won't clog your application equipment. Additionally, you will find the packets are easy to store, transport and handle.

## USE RATES OF DEMON WP

<b>Pests</b>	Ants, Aphids <sup>2</sup> , Assassin Bugs <sup>2</sup> , Boxelder Bugs, California Oakworm <sup>2</sup> , Centipedes, Chiggers <sup>2,3</sup> , Chinch Bugs <sup>2</sup> , Cockroaches (Maintenance), Crickets, Earwigs, Elm Leaf Beetles <sup>2</sup> , Firebrats, Fleas <sup>3</sup> , Flies <sup>1</sup> , Millipedes, Mites <sup>2</sup> , Mosquitoes <sup>3</sup> , Pillbugs, Silverfish, Sowbugs, Termites <sup>5</sup>	Ants <sup>2</sup> , Bees, Carpenter Ants, Carpenter Bees, Cockroaches (Clean-out), Fire Ants (Mounds) <sup>2</sup> , Scorpions, Sod Webworms <sup>2</sup> , Spiders, Ticks, Wasps
<b>Concentration of Active Ingredient</b>	0.1%	0.2%
<b>Dilution Rate Water-Soluble Packet</b>	1 packet <sup>4</sup> per 1 gal water	2 packets <sup>4</sup> per 1 gal water

<sup>1</sup> Not for indoor use in California for fly control. <sup>2</sup> Not approved for use in California. <sup>3</sup> Outdoor use only. <sup>4</sup> 1 packet = 0.33 ounces of Demon WP. <sup>5</sup> Above ground only.

Demon WP maintains stronger control much longer than competitive insecticides.

## RESIDUAL EFFECTS OF DEMON WP AND TEMPO® WP: Percent Mortality 48 Hours After Exposure to Treated Surface
