

InVade™

bio bullet

Super-Concentrated Premium Microbes for Grease Trap Maintenance and Other Bio Remediation Applications in a Slow-Dissolving Solid Block

InVade™ Bio Bullet™ is a solid, microbe-laden, block for use in degrading organic waste in lower flow systems such as restaurant grease traps. The safe, naturally occurring bacteria are present in high numbers to handle difficult organic problems. The unique brick will gradually dissolve over a 30-90 day period which allows for continuous treatment and degradation

of waste. The naturally occurring bacteria contained in the block will reduce odor, sludge, fats, oils and grease buildup. InVade Bio Bullet can also be hung from drain covers to continuously treat smelly, scummy, slow or infested drains. Label and MSDS sheets are available at www.rockwelllabs.com.

Product Code:

IBBL121 - 12 x 1 lb bullets

IBBL405 - 4 x 5 lb bullets
