SUNBURST®

Attractive and discreet portable flying insect management system to protect against all types and sizes of flying insects.

Economical and designed for front-of-house areas where flying insect management should be hidden from view, its elegant and decorative design conceals the glue board and captured insects. Discreet, stylish and environmentally responsible, the Sunburst is ideal for hotels, restaurants, bars, and retail shops.

- Powerful, lead-free, Quantum 18-watt Lynx lamp
- All metal unit available in white, black or silver
- Safe and effective flying insect management
- Virtually maintenance free. Silent operation. Low operational costs
- Place on a table top, bar back or work top.
- Electronic ballast for maximum efficiency
- Dual voltage systems can be used in 110v - 230v environments with an IEC connection.
- Discretion black and high intensity white glue boards are available for these systems. For 230 v systems designate plug type
