

Torpedo® EZ

When it comes to keeping railways, roadways and utility grounds manageable and weed-free, Torpedo® EZ herbicide works. This product delivers long-lasting, broad-spectrum control and even halts herbicide-resistant weeds.

Key Uses

- Non-crop areas where bare ground is desired for industrial vegetation management (IVM)

Weeds controlled

- Canada fleabane
- Common ragweed
- Common waterhemp
- Dandelion
- Eastern black nightshade
- Green foxtail
- Green pigweed
- Hairy nightshade
- Kochia (including Group 2-, 4-, and 9-resistant biotypes)
- Lamb's-quarters
- Large crabgrass
- Palmer amaranth
- Pennsylvania smartweed
- Redroot pigweed
- Velvetleaf
- Wild buckwheat
- Wild mustard (including Group 2-resistant biotypes)
- Witchgrass

Benefits

- Provides residual control of susceptible weeds
- Easy-to-use liquid formulation with low use rates
- Two active ingredients (Group 14 and 15) for management of Group 2-, 4-, 5-, and glyphosate-resistant weeds that are on the label
- Tank-mix flexibility with post-emergent herbicides
- Low risk of off-site movement

Tank-mix partners

- Glyphosate
- 2,4-D ester
- Arsenal®
- Banvel®
- Garlon™
- Hyvar® XL
- Karmex®
- Krovar®
- Telar®
- Tordon™
- Vanquish®

ACTIVE INGREDIENT

- > Group 14 (flumioxazin)
- > Group 15 (pyroxasulfone)

RATES

- > 880 – 1,215 mL/ha (356 – 491 mL/ac)
- > One case treats 12 – 16 ha (30 – 40 ac)
- > Use higher rates on fine-medium textured soils for longer residual control

TANK-MIX ORDER

- > Torpedo EZ
- > If tank-mixing with other labelled herbicides follow WAMLEGS
- > Non-ionic adjuvant @ 0.25% v/v (post-emergence applications only)
- > If mixing with another herbicide consult label for mixing instructions. Always use in accordance with the most restrictive label and use precautions.

APPLICATION TIMING

- > Pre-emergence – apply prior to weed emergence
- > Post-emergence – when weeds are already emerged, apply Torpedo EZ with a non-ionic adjuvant (0.25% v/v) or in a tank-mix

RAINFAST

- > 1 hour

NOTES

- > Moisture is necessary to activate Torpedo EZ on soil for residual weed control
- > The length of residual control is dependent on the rate applied, amounts of rainfall and temperature conditions
- > To ensure uniform coverage, use 200 – 600 L/ha spray solution (80 – 243 L/ac)
- > Do not graze livestock on treated areas
