CAT REPELLENT PROFESSIONAL

DOMESTIC & FERAL CAT ACTIVITY

Pet cats, both owners & others in the neighborhood, often create outdoor litter box areas in flower beds, shrubs and planting areas making gardens bad smelling and unsanitary for children and other pets. Feral cats, born from strays, frequently establish lounging and litter box areas within suburban and other settled areas. These cats live in the wild and are uncared for. Many carry illnesses, mange and parasites and can transmit them to treasured pets.

EPIC's granular professional grade cat repellent is specially formulated and tested to naturally train cats to avoid treated areas and is both easily applied and long lasting. EPIC's Cat Repellent Professional is safe around children and plants and is a low cost solution to rid property and eliminate unwanted visitors and unpleasant odors — provides strong repelling power without harming pets, people or the environment. Use in landscaping, gardens and outdoor potted plants to keep cats away. All Season Use - Lasts for a full 14 day cycle.

EASY STEP APPLICATION

To Apply: Apply Professional Cat Repellent using the scoop provided in the bucket. One scoop will cover approximately 40 square feet.

Cover areas where cats repeatedly use for defecation.

Apply 2 times, 14 days apart to the same area. Re-apply 30 days later.

We suggest to dig out or rake out any previous cat droppings before application. Can also apply in outside potted plants without fear of or hurting the plants. Not For Use Inside Homes Or Buildings.

Our products are for
OUTDOOR USE ONLY
and are formulated to be used in
any climate or temperature.
