

# HOW MANY TIMES A DAY DO YOU STOP SPRAYING TO PUMP?

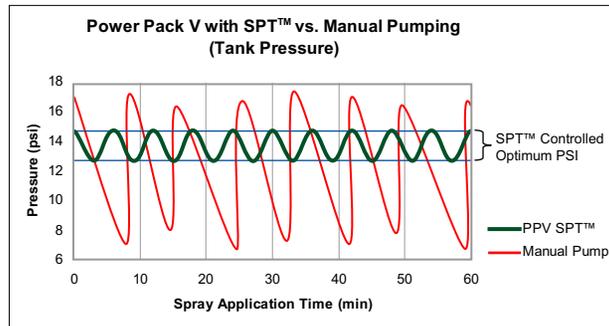

IT'S OVER 100 TIMES TO MAINTAIN OPTIMUM PRESSURE.

You count your pumps, but the pressure fades fast, leaving you with a weak flow, uneven application, and the need to pump again and again.

With Smart Pressure Technology™ our units maintain optimum tank pressure throughout the application automatically.

The right pressure, the right coverage for exact results, every time.

- Spray 6 to 8 hours on a single charge with Smart Pressure Technology.
- Replace manual pumping with our automated, rechargeable, pressurizing system.
- Maintain precise, optimum spray pressure automatically.
- All components are built to last, period.

"I purchased a Green Gorilla with Advanced Spray Technology for an employee who had been complaining about shoulder issues from constantly having to pump a backpack sprayer. Since then the employee loves it and the productivity has definitely increased. We plan on purchasing one for each of our service trucks."

- Keith Brooker, CEO of Paragon Pest Solutions, Inc. Brevard, FL
