SECURING RODENT ROCK™ BAIT STATIONS TO GROUND

Product No. 918

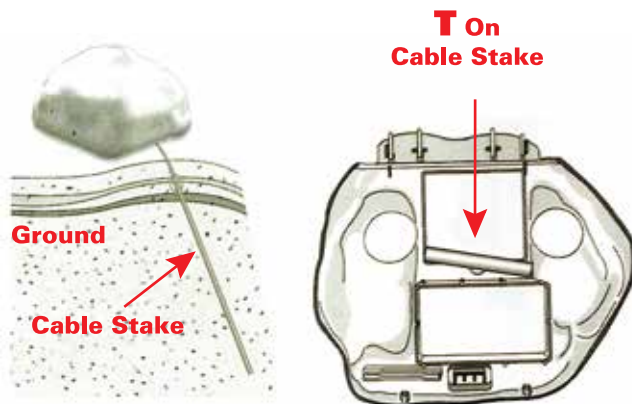

ALUMINUM CABLE STAKE

Hardened Aluminum Stake to Secure Rodent Rock Stations.
Stake is 15 1/2 inches long x 3/8 inch Diameter with an 8 inch Cable and 3 inch Stopper.
Packed 12 Stakes per Case

HOW TO USE

Drive stake flush to the ground with a hammer, insert **T** on cable into pre-drilled hole on bottom of any bait station.

STEP 1

Set Anchor end opposite where cable is attached point down into ground where you want anchor to be.

Product No. 913

EARTH ANCHOR

Stainless Steel to Secure Rodent Rock™ Stations.
Cable is 20 inches long with Cast Aluminum Anchor.
Packed 50 Stakes and 2 Heavy Duty Pounding Rods per Case

STEP 2

Using a mallet, pound stake, with pounding rod into ground leaving enough of the **T** on the anchor exposed to insert into station.

STEP 3

With Earth Anchor in place and enough of the **T** exposed, remove pounding rod.

STEP 5

Place Rodent Rock™ over stake through the pre-drilled hole on bottom of Rodent Rock™.
Station is now ready for use
