

AN EXTRA LARGE DESIGN FOR EXTRA LARGE YARDS

- ✓ Protects Up To 1 Acre
- ✓ Durable All-Weather Construction
- ✓ No Pesticides/Odor-Free
- ✓ Patented Insect Control Damper

Our award winning DynaTrap® technology uses a 3-way protection plan for insect extermination. Powerful UV emitting fluorescent bulbs produce warm and bright light that attracts insects to the unit. The DynaTrap® also produces carbon dioxide, which is irresistible to mosquitos. After Insects and mosquitos are lured to the trap, the powerful fan draws them into the retaining cage where they dehydrate and die.

BIGGER IS BETTER

The DT2000XL is twice the size of the DT1100, has brighter bulbs, high-capacity catch basket, and a more powerful fan.

FEATURES

- Indoor/outdoor
- No expensive attractant or propane necessary
- Smokeless – pesticide and odor free
- Operate 24 hours a day, 7 days a week
- Provides up to 1 acre coverage
- Durable all weather construction
- Easy to set up & whisper-quiet
- 1 year warranty
- Includes: Two UV Bulbs - approx. 3,000 hours (4 months), cleaning brush, 10 ft. cord - 120 VAC

See reverse side for more information.

Our Customers Say It Best... "I use DynaTrap to free our deck and close backyard of mosquitos – and it REALLY WORKS!" John B., Raleigh, NC

Attract, trap and kill flying insects including mosquitos, biting flies, Asian beetles, wasps, hornets, yellow jackets, moths, stink bugs, no-see-ums and more!

HOW IT WORKS

1 ULTRAVIOLET RAYS

The DynaTrap's special UV bulbs generate warmth and UV rays, attracting flying insects night and day.

2 TITANIUM DIOXIDE COATING

The exclusive TiO₂ (Titanium Dioxide) coated surface produces CO₂ (Carbon Dioxide), irresistible to mosquitos. This occurs through a photocatalytic reaction, when UV rays hit the TiO₂ and organic matter (pulled in by the airflow from the fan) turns into CO₂ and H₂O (water vapor).

3 POWERFUL VACUUM ACTION FAN

DynaTrap's powerful, yet whisper-quiet fan draws insects into the retaining cage, where they are trapped by the vacuum action, and eventually dehydrate and die (usually within 24 hours). The retaining cage is removable, allowing the contents to be emptied into the trash. It also contains an automatic damper to confine flying insects to the retaining cage when the trap is turned off.
