

Maxforce[®] FLY SPOT BAIT

Product information sheet

// BEST USES

Maxforce[®] Fly Spot Bait provides a discreet and effective way to control house flies in commercial and residential structures such as non-food/non-feed areas of commercial food handling establishments, restaurants, dining areas, storage facilities, schools, hospitals, nursing homes, offices and buildings at marinas. Maxforce Fly Spot Bait may also be applied inside dumpsters and other waste containers located indoors and outdoors.

// KEY STRENGTHS

Powerful attractants combined with the *active ingredient imidacloprid, which kills flies in 60 seconds or less*. This product provides immediate results with a long residual.

Benefits of Maxforce Fly Spot Bait

- Easy application
- Immediate results
- Long residual (up to 4 weeks)
- Treat less surface area
- Sprayable formulation
- Low odour
- Controls pyrethroid resistant flies

How to apply Maxforce Fly Spot

Dilute Maxforce Fly Spot by mixing 125g per L of water (1.25%). This is accomplished by adding 2.2 packages per L of water (or 1 package per 450mL of water).

Rate of Application

Low to moderate infestations: apply two litres of finished spray to treat 100m² of fly-resting surfaces.

Moderate to high infestations: apply four litres of finished spray to treat 100m² of fly-resting surfaces.

Where to Apply

Spray diluted Maxforce Fly Spot Bait on fly resting areas such as on walls, around windows and the inside surfaces of dumpsters or trash collection bins. Apply product in spots ranging from 0.3 to 1.0m² in locations where house flies tend to rest.

// FOOD/FEED HANDLING ESTABLISHMENTS:

Applications in food/feed handling establishments are permitted ONLY in non-food/non-feed areas. Non-food/non-feed areas include garbage rooms, lavatories, entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, mop closets and storage (after packaging, canning or bottling).

// WHY USE MAXFORCE FLY SPOT BAIT

- Maxforce Fly Spot Bait provides fast and effective results, while eliminating the need to treat large surfaces.
- Maxforce Fly Spot Bait fits well into an overall integrated pest management program for house flies that includes proper sanitation and environmental controls, such as exclusion and proper light management.

// ADDITIONAL APPLICATION INFORMATION

- Apply with low pressure sprayer, do not exceed 20 PSI.
- Re-apply if house flies continue to be a problem, but not before 7 days.
- Treat as a wettable powder and agitate diluted material frequently throughout the day.
- Applications of this product may leave a visible residue or discolour some surfaces. Before treating, it is advisable to test application in a small inconspicuous area.
- Avoid keeping diluted material in sprayer for more than a couple of days. If storing diluted product in the sprayer, ensure that you properly label and store this material in accordance with provincial and federal pesticide regulations.

// RESTRICTIONS

- Do not exceed more than 500g of product per 100m².
- Treated bait spots must be placed in locations NOT accessible to children, pets, livestock or wildlife.
- Do not apply in food areas of food processing or manufacturing facilities or in agriculture facilities.
- Do not apply in classrooms or patient rooms.
