The flexible PVC base allows Bird-Flite to curve along these sign letters.

Low-Visibility

Clear polycarbonate base and thin stainless steel rods are nearly invisible even from short distances.

Easy to Install

The base can be glued or screwed in place. Available in one foot lengths, each section can be broken into smaller sections to accommodate any architectural configuration. Pieces can also be kinked or permanently bent to conform to sharp angles.

No Debris

Bird-Flite's wires are spaced 1.5 inches on center—far enough apart to repel pigeons, yet avoid entrapping debris, like paper, twigs, etc.

Humane

Bird-Flite's spikes are blunted, preventing injury to birds or unsuspecting workmen. Birds typically hover above products before loafing so they will not be harmed.

Available in Three Widths (all are 12 in. long)

Because ledges vary in size, we offer three widths: Narrow, Wide and X-tra Wide.

N 2-1/2"

W 5"

XW 8"

Even up close, Bird-Flite offers a discreet solution to ledge protection.

Bird-Flite protects the parapet and sign for this strip mall eatery.

Easy Application:

Five or six dabs of Bird Barrier Bond per 12" section is all it takes to secure Bird-Flite for the long run.
