

AQUABAC

- A biological product
- Safe for rain barrels, water plants & ponds
- Simple and easy to use
- Use early to control mosquitoes at the larval stage
- Use regularly to keep new larvae at bay

The first application is recommended in April as ice is melting off water sources. Subsequent applications should be on a seven day cycle for two months, then only as required.

One container will treat 1000 square metres.

By controlling larvae early, the risk of mosquito bites during the season is reduced.

ASSIST BACTERIA IN THE NATURAL BIODEGRATION OF ODORS AND CLEANING WATER....

THE PROBLEM

Black smelly dugout water during winter and early spring is usually caused by decaying organic matter entrapped in the dugout, organic matter builds up in dugouts from algae and weed growth and is also washed in to the dugout by runoff water. In the fall, after algae and weed growth stops, decaying begins along with other materials such as tree leaves, grass and even manure. The decaying continues after freeze-up and water is robbed of oxygen. In other words, it becomes septic. Under these conditions, odor is reduced and water turns black.

THE SOLUTION

Pond Boss speeds up the decaying process when applied in the early spring to early fall. When freeze-up arrives, the decaying is complete and the water is not robbed of oxygen. The result is clean, odor-free water.

THE RESULT

IS CLEAN, ODOR-FREE WATER

CONTROLS ALGAE IN YOUR WATER SUPPLY

AGRICULTURE

Animal drinking water, water tanks and lagoons.

INDUSTRY

Cooling towers, process water systems, waste tanks, lagoons

RECREATION

Golf course ponds, fountains, boat water tanks, small man made lakes

COMMERCIAL USE

Think Purity Algaecide Solution is an innovative formulation which provides an excellent control of algae in ponds, dugouts, lagoons and potable water storage tanks.

- farm ditches - lakes - canals

LAKE AND POND COLORANT

Features & Benefits of WAVEX

1. **Easy to use** • does not need to be prediluted and no special equipment required
2. **Concentrated** • disperses readily by currents and natural movement of water
3. **Cost effective** • can last up to 4 to 5 weeks or more
4. **Non corrosive** • will not damage equipment or tools
5. **Give natural appearance to water** enhances the beauty of lakes, ponds, Aquariums and many bodies of water
6. **Non toxic** • safe to fish, aquatic species, waterfowl, wildlife and pets

WAVEX is a high quality, concentrated water colorant. It creates a beautiful natural appearance to lakes, ponds and larger aquariums.

WAVEX is safe to fish and aquatic species, waterfowl, wildlife and pets.

WAVEX is noncorrosive and when used according to recommended rates, will not stain stone, fountains, approved aquatic features or swimwear.

- ✓ Ideal for lakes, ponds and farm dugouts
- ✓ Quickly becomes biologically inactive
- ✓ After application, wait only one day for swimming and 5 days for drinking
- ✓ Not harmful to fish, birds, livestock or wildlife
