## FIRE RETARDANT:

The laminated material was tested to "CFR Title 16 Part 1632 (FF4-72) Standard for the Flammability of Mattress and Mattress Pads - Ticking Substitution Procedure Part 1632.6" and received in conclusion a "B" Classification and tested to meet the American Standard ULV-O Burn Test requirements.

## WARNING:

The plastic bag is not a toy. To avoid danger of suffocation, store this plastic bag and encasement when not in use away from babies and small children.

## DIRECTIONS FOR APPLICATION:

Apply the protector on the mattress with the soft side to the outside and the laminated side to the inside. Starting at the head of the bed, unzip the encasement and gather the fabric to locate the bottom two end corners. Align and apply the end corners first to the end of the mattress on each side. Carefully slide the encasement, inch by inch, down the length of the mattress, avoiding stress on the zipper end stop. Align the corners of the cover with the corners of the mattress. Zip the cover all around the mattress and secure the encasement by using the patented "Zipper with the Hook"®. For additional security, insert the Zip-Tie into the Loop and secure to ensure tamperproof encasements.
