

Terminator™

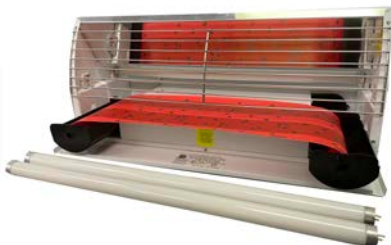

Paraclipse®

#251350
White Aluminum

#252350
Stainless Steel

The Terminator™ is a patented, long lasting, highly effective fly control system covering approximately 10,000 sq. ft. Utilizing UV light and an exclusive auto-advancing glue cartridge to capture more insects. The Terminator™ is a commercial/industrial unit that is dual-sided and can be mounted in 3 different positions for optimum functionality. Available in both painted aluminum and stainless steel, these units are perfect for larger areas including receiving areas, large kitchens, barns, veterinary clinics, supermarkets, warehouses, hospitals, etc. This high volume 60-day cartridge system traps 20 times more flies than a standard glue board unit.

Features:

- * Dual-sided, large capacity fly and insect control that is proven to be highly effective for high density insect areas.
- * Non-toxic.
- * No pesticides or insecticides.
- * No touch glue surface.
- * Eliminates large quantities of flies.
- * Automatic tone notifies when to replace the used cartridge.
- * Meets USDA & FDA guidelines.
- * Draws flying insects to trapping surface and keeps them trapped.
- * Wall mounted or placed on a level surface.
- * Directs light out and down to increase overall effectiveness.
- * Unit keeps your establishment safe and free from flies carrying diseases such as Salmonella and E.coli.
- * Cartridge holds 20 times the capacity of a glue board. The auto advancing cartridge system rolls the trapped flies inside the cartridge so you never handle the fly covered trapping surface.

Designed For:

Commercial Kitchens | Supermarkets
Food Processing Plants | Warehouses
Food Preparation Areas | Bakeries
Hospitals | Poultry & Egg Ranches
Manufacturing Plants | Livestock Facilities
Veterinary Clinics | Horse & Dairy Barns
