

- Detects all levels of bed bug infestations
- Black design attracts bed bugs and allows for easier identification of early instars
- Crack and break-resistant
- No powder, tape or additives necessary
- Detection as early as two weeks

BlackOut[®]

BED BUG DETECTOR

THE PROVEN INNOVATION FOR BED BUG DETECTION

14 Thomas J. Rhodes Industrial Dr., Hamilton, NJ 08619

SenSciOnline.com

SenSci BlackOut catches bed bugs to detect their presence in a structure by placing the device under the legs of beds and upholstered furniture to help intercept bed bugs as they move throughout the environment searching for a blood meal.

BlackOut is developed by the innovation team that brought you the SenSci Activ[®] and SenSci Volcano[®]
