

MOSQUITO ELIMINATOR™

The Paraclipse Mosquito Eliminator lets you take back your outdoor spaces. This decorative system is designed for installation outdoors, combining a proprietary Ultraviolet black-light technology with special attractants to lure mosquitos. Used free-standing or wall mounted, the Mosquito Eliminator is a powerful, effective and environmentally safe way to control disease-carrying mosquitos.

The patented auto-advance cartridge lasts 30 days and can capture thousands of mosquitos! The Mosquito Eliminator is also effective at attracting and capturing midges and other irritating pests. Disposal of the cartridge is safe and sanitary.

The Mosquito Eliminator ends the noise and unsanitary scattering of insect parts from bug zappers and avoids hazards from toxic chemical pesticides.
