

Scorpion & Spider Trap/Monitor

Proprietary Attractant

Attractant impregnated into the glue for release when the protective paper is removed. This attractant will also lure insects which will enhance scorpion and spider entry.

(Photo taken Oct. 1st, 2021 - Bandera, TX)

Black Interior

Printed black interior is designed to take advantage of the fact that arachnids and insects prefer dark places for harborage and hiding places for attacking their food source.

Discreet

Slides easily under & behind equipment and tools, under & behind furniture, in cabinets, along garage inner foundations, next to garage entry steps, indoor baseboards, coat closets, etc.

Designed to Catch & Keep

Both ends have flat surface entry ways. The Scorpion and/or Spider moves into for security or hiding & attacking. Wings over center window entries keep out dust and provides air flow to disperse attractant.

May be used in and not limited to:

- | | | |
|---------------|---------------|-------------|
| Garages | Warehouses | Homes |
| Storage Areas | Nursing Homes | Schools |
| Day Cares | Hospitals | Restaurants |
| Apartments | Vessels | |
- Places where Scorpions & Spiders have been seen

Printed in both English and Spanish

Easy to Use

PSS-0100

Veseris SKU #
846820

TRAP SIZE
8"L x 3-3/4"Wx3/4"H

PACKAGE SIZE
100ct/box
Wt: 4.2lbs

	Directions:	Modo de empleo:
	Peel off protective paper from sticky base.	Despegue el papel protector de la adhesiva.
	Form trap by placing tab "A" into slot "B".	Cierre la trampa, colocando la lengüeta "A" en la ranura "B" para formar un techo sobre la superficie adhesiva.
	Leave ends flat for Scorpion & Spider entry.	Deja los extremos planos.
	Check trap regularly. Record findings.	Verifique la trampa ocasionalmente. Registrar hallazgos.
	When glue area is full of arachnids or other insects, dispose of trap & replace with a fresh one.	Cuando el área de pegamento esté llena de arácnidos o insectos, deseche la trampa y reemplácela por una nueva.
