QUIK REEL™

REMOTE CONTROL RETRACTABLE HOSE REEL SYSTEMS

> Model QR-50

THE QR-50 remote controlled retractable hose reel, will rewind the hose whenever a button on a small hand-held transmitter is pressed. The retraction is powerful enough to rewind the full length of the hose even when full of fluid. Unlike our other Quik Spray™ models, this unit is not designed to assist the operator up hills. This small 12V DC motor powered Quik Spray™ unit is ideally suited to all small spraying applications and is the perfect adaptation to existing systems.

As the QR-50 is so lightweight and versatile, it is perfect for use on small all-terrain vehicles and bikes, pest control in and around buildings, inside nurseries, glasshouses, and any other application where only a maximum of fifty (50) meters of hose is required. The special "Supa-slip", high strength nylon hose used on all Quik Spray™ units is lightweight and kink resistant.

The benefits of using a QUIK REEL™ ensure it will pay for itself in a very short time!!
