- ✓ **Eco-Friendly**. Ideal around organic gardens, flowerbeds & landscaping. For Outdoor Use Only.

Comparing "apples to apples" to another granular snake repellent...

Snake-A-Way

- ◆ **Pesticide/ EPA Required Sulfur & Naphthalene** *Commonly used in mothballs is a solid compound that turns into toxic gas
- ◆ **Hazardous to Humans & Domestic Animals** *Gloves required. Harmful if swallowed, avoid breathing vapors. Avoid prolonged skin contact.
- ◆ **Toxic to Fish** Cannot be applied near streams, ponds, pools or water supplies.
- ◆ **Claims to work on Poisonous Snakes but effectiveness is limited.** Label says "It is not expected to consistently repel corn snakes, cottonmouths, moccasins, or copperheads. * *These venomous species are across the USA.
