

# SHEFFIELD Soil Augers

**SUPERIOR QUALITY**  
paired with **VERSATILITY**

Build the Sheffield Augers your company needs. With 4 types of adaptors, our augers work with any hammer drill....spline, sds+, sds max, and hex.

Drill holes to accommodate Dow's Sentricon or FMC's FirstLine.

Add a widening adaptor to drill holes to accommodate Whitmire's Advance station.

Accessorize your auger to include a cup-cutter to remove thatch.

**VERSATILE**

**STRONG**

**DURABLE**

**EFFICIENT**

Sheffield Soil Augers have a rope threaded shaft to work with any hammer drill on your truck. We offer Hex, Spline, SDS+, & SDS Max chuck system adaptors.

The solid steel core gives you a strong, durable auger for years of service.

Easily drills 2 inch holes in even the heaviest clay soils to accommodate the Sentricon and Firstline bait stations.... Add the 2-1/2" widening adaptor for use with Whitmire's Advance Bait Station.

Makes even the largest jobs fast & efficient.

Item No.	Description
008S-RT-CTSA-200	Soil Auger Body
008-S-RT-CC	Cup Cutter
008S-RT-CTW25	2-1/2" Widening Adaptor

Use Sheffield's 7-1/4" Cup cutter to remove thatch/grass for important bait station-to-soil contact.

Attach the 2-1/2" widening adaptor to drill larger diameter holes for Advance Bait Stations.

## 15" Adaptors

Item No.	Description
008S-RT-AD-HEX-15	For Hex chuck systems
008S-RT-AD-SPL-15	For Spline chuck systems
008S-RT-AD-SDS-15	For SDS+ chuck systems

## 9" Adaptors

Item No.	Description
008S-RT-AD-HEX	For Hex chuck systems
008S-RT-AD-SPL	For Spline chuck systems
008S-RT-AD-SDS	For SDS+ chuck systems
008S-RT-AD-SDSM	For SDS Max chuck systems

## TIP:

*When Installing the Bait Station, be sure there is good contact of the bait station to the soil. Use the Sheffield Cup-Cutter to clear any thatch that prevents bait station from contacting soil.*

Scan QR Code for instructions on how to install widening adaptor.
