

JECTA[®]

Diffusable Boracide

Jecta is a ready-to-use injectable borate gel used by PMPs to reach places where other products can't be applied effectively. Jecta is packaged in a 10-oz. caulking tube, so you'll need the 10-oz. size caulk gun for application. Jecta protects sealed, moisture-laden or inaccessible wood from wood decay, termites and other wood destroying organisms.

Jecta's patented carrier system facilitates rapid penetration throughout wood of any moisture content.

Stops wood rot in:

- window & door frames
- garage thresholds
- deck and fence posts

Stop decay in its tracks. Kill and prevent WDOs with Jecta.
