

PROTEK II Drill Interrupter

Helps prevent damage to grounded metal pipes, conduit, and reinforcement steel. Reduces bit breakage, too!

- High capacity, heavy-duty components
- Sturdy, cast-aluminum housing
- Built-in Ground Fault Interrupter
- Rated at 13 amps, 110-120v
- One year parts and labor warranty
- Grounded, 3-wire drill recommended

The rugged PROTEK II Drill Interrupter stops power to a rotary hammer drill instantly upon bit contact with grounded metal piping, conduit, or reinforcement steel during concrete drilling operations.

The PROTEK II is used extensively by termite control specialists, radon-control technicians, and general contractors to avoid drilling into metal conduit and piping.
