## Advantages

- Cost effective
- Quick & easy to install & Service
- Proven multi-strain microbial formula
- Pre-set timer - NO programming required
- No heavy buckets to clean, fill, lift, & carry
- Meets the same eco-friendly standards as other *BioStim* microbial formulas
- Small dispenser size allows for more flexible installation
- Highly concentrated formula provides better results than most larger injection systems
- For use in food service and other facilities with grease and organic waste in their drain lines. The MicroDrip Dispenser injects one highly concentrated dose of MicroDrip formula every 14 minutes to provide continuous microbial treatment to the main drain line to reduce grease and organic buildup. Fits easily into your program for facilities with sanitation issues.
