

## Sticky Don™

Sticky Don™ is a long time dream come true. It's the glueboard version of the most legendary Insect Light Trap of all time, the Gilbert® Don™. The new Sticky Don™ features the fly catching ability of the legend combined with revolutionary new, maintenance-saving, easy access Tilt-A-Trays™.

The Sticky Don™ holds up to 9 glueboards while providing the wide angle of attraction and mounting versatility of the legend. It may be corner or flat-wall mounted. Both Dons™ make flies an offer they can't refuse.

**Insect Attractant Lamp:** Osram Sylvania® F40/ 350BL ECO (40 watt). Since 1967, there has been no better fly attractant lamp.

**Construction Features:** 4 3/4" deep wall-hugging profile. Frame and interior structure made of aluminized steel (lifetime auto muffler material).

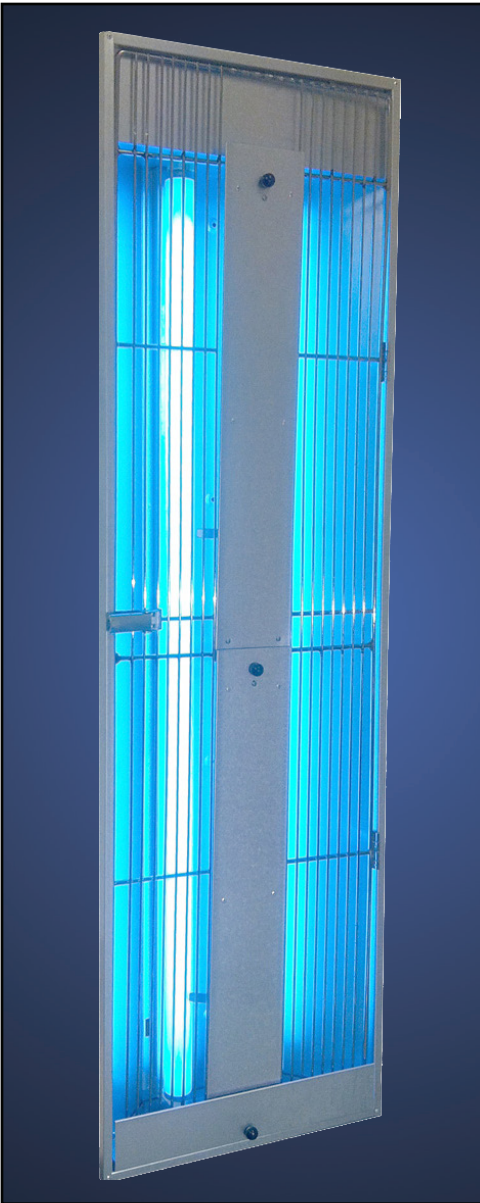

**Installation:** Flat-Wall or Corner mount with keyhole slots. Generally speaking, lower positioning yields best results.

**Electrical:** Six foot, 3-wire grounded power cord. Standard 115v/60hz.

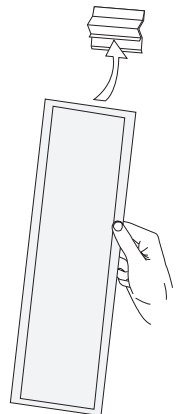

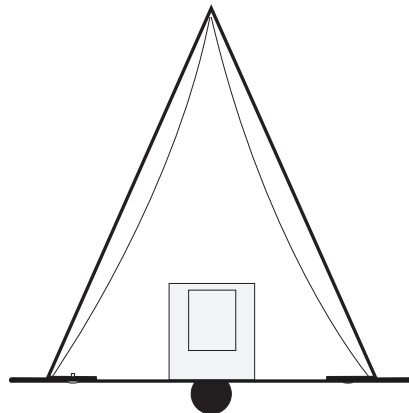

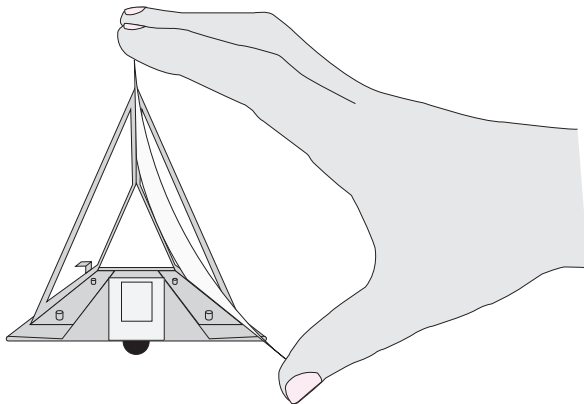

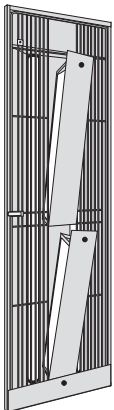

**Dimensions:** 54 3/16" x 16" x 4 3/4".

**Weight:** 28 lbs, Ship Wt.: 37 lbs.

FIVE YEAR WARRANTY (Excluding lamps and glueboards).

The Gilbert® Sticky Don™ Holds Up To 9 Glueboards. Place your first two boards in the lower Tilt-A-Tray™:

1) Tilt Out Tilt-A-Tray™. 2) Slip Glueboards Into Tilt-A-Tray™ From Above. 3) You May Wedge Additional (Optional) Glueboards Into Upper Tilt-A-Tray™ or Side Clips. 4) To test our original, ancient claim that flies respond best at lower heights, try placing a cut-down glueboard in the horizontal tray at the very bottom of the trap. Compare catch of lower vs higher placed boards.
