

# 2-1/2" Glycerin Filled Pressure Gauges

Designed for use where shock or pulsation cause premature failure of pressure gauges. The standard glycerin filling will dampen the tube and point movement. The fill also lubricates and protects the movement and prolongs the life of the gauge. Glycerin filled gauges are often specified for hydraulic applications and for machinery or equipment that are used in hydraulics.

## Construction

**Case:** 304 stainless steel

**Connection:** Brass 1/4" NPT standard.

**Lens:** Plastic.

**Accuracy :** + / - 2.5%

**Measure/Range:** 0~15psi / 0~6000psi.

**010-GG-300**  
0-300psi

**010-GG-600**  
0-600psi

**Pro-Pest® Glycerin Filled Pressure Gauges are:**

- Shock-Resistant
- Durable
- Dependable
