

Vent Hood Magic

Vent Hood Magic foaming exhaust hood cleaner/degreaser is a specially designed surfactant blend made from natural plant derived materials. *Vent Hood Magic's* foaming formula is designed to coat commercial exhaust hoods and flues with eco-friendly grease removing foam. It removes fats, oils, grease and other organic buildup.

Vent Hood Magic was designed for use with an automatic spray/mist system as part of a daily routine maintenance program. It can also be used in a spray bottle or hand held foamer to clean grease buildup almost anywhere including roof top exhaust fans.

Advantages

Reduces:

- Excessive manual cleaning
- Fire causing grease buildup
- Corrosion
- Foul odors

- Environmentally friendly
- Not caustic or corrosive
- Low cost
- No need to shut down the line when used with an automatic spray/mist system
- Safe for metals, stainless steel, plastic and drain lines

Available in:
1 gallon bottles or 55 gallon drums.

BioStim
THE SCIENCE OF NATURE

Vent Hood Magic foam is safe for metals, stainless steel, and drain lines. It does not contain VOC's, phosphates, free enzymes or caustic/corrosive chemicals. It is a specially designed surfactant blend made from natural plant derived materials that are 100% biodegradable making it safe for the environment.

Vent Hood Magic is designed for used in conjunction with BioStim's other microbial drain line maintenance formulas. It will not harm, in any way, the organisms in our microbial formulas that keep the drain lines free of grease. When used in conjunction with BioStim's microbial drain line maintenance formulas, the grease released into the drain lines will be digested and converted to carbon dioxide and water.

Before treatment with *Vent Hood Magic*

After treatment with *Vent Hood Magic*

For best results start treatment after vent hood has been cleaned.
Vent Hood Magic will keep your hood grease free.
