ON-TOP PRO2

Innovative, discreet and stylish flying insect management system. These unique overhead designs are the ultimate in discretion and fit easily into new or existing suspended-ceilings. Ideal for convenience stores, supermarkets, and other facilities where space limitations have previously prohibited wall-mounted UVA systems.

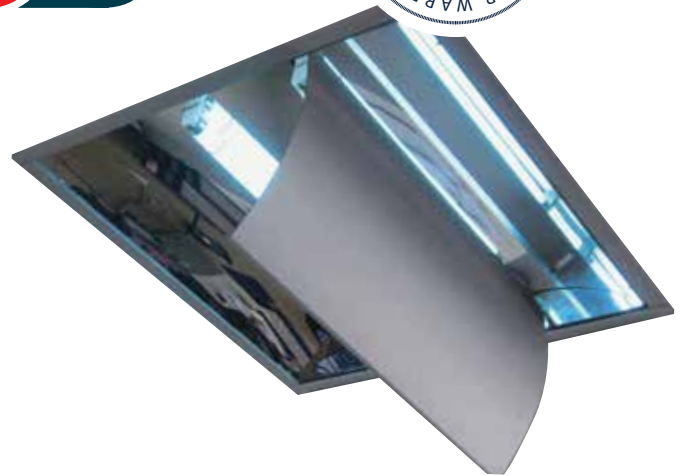

The patented design avoids the possibility of fall-out and will efficiently control infestations in public spaces.

When it comes to discreet systems, the On-Top Pro2 is head and shoulders above the rest!

Uniquely designed to fit discreetly and easily into new or existing suspended-ceilings. The On-Top Pro2 is ideal for use in supermarkets, fast food stores, offices, and convenience stores where space limitations have previously prohibited wall-mounted UVA systems.

The unique unit can be placed above aisles and will control infestations in public spaces as well as in the loft/ceiling areas where allowed. Patented design provides 360° protection and fits ceilings with 24" x 24" tiles. The system utilizes two powerful 25-watt Quantum BL shatter resistant lamps (50 watts) and one full-size PestWest glue board.

Lamps are interchangeable with the Mantis® MAX 50 and the Mirage Pro VS. Glue boards are interchangeable with most all other Mantis® systems. Includes a 24" T-cross bar for easy retrofit of 48" tiles. May have to be hard wired depending on city/county codes. Consult with a licensed electrician for details in your area.
