

To eliminate roaches, vary the menu

**Rotate Alpine® Cockroach
Gel Bait Rotation 1 and 2
Reservoirs to prevent
bait aversion**

When a single gel bait product is used exclusively for roach control, cockroach strains can demonstrate feeding aversions. BASF developed **Alpine®** Cockroach Gel Bait Rotation 1 Reservoir and **Alpine®** Cockroach Gel Bait Rotation 2 Reservoir to help prevent bait aversion from developing in your accounts.

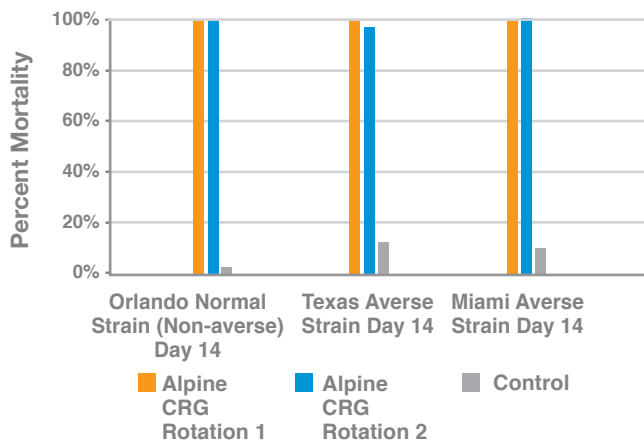

Use this rotation system with confidence, knowing that each formulation provides different food ingredients.

Alpine Cockroach Gel Bait Rotations 1 and 2 Reservoirs control roaches quickly and reliably.

- **Attractive:** Both bait matrices appeal to gel-bait averse and non-gel-bait averse cockroaches
- **Fast-Acting:** Begins killing roaches within minutes after exposure to bait
- **Reliable:** This rotation system guarantees different food ingredients in each formulation

Attractive Baits

Efficacy of Alpine® Cockroach Gel Bait Rotation 1 & 2 Matrices Against Normal and Gel-Bait-Averse German Cockroaches

Dangsheng, Liang, PhD., Apex Bait Technologies, Inc., Report Number: 1636. Date 3/2010

Offers two palatable bait matrices appealing to gel-bait-averse and non-gel-bait averse cockroaches

Reliable Rotation System

Alpine® Cockroach Gel Bait Rotation 1 Reservoir
Article#: 59014068

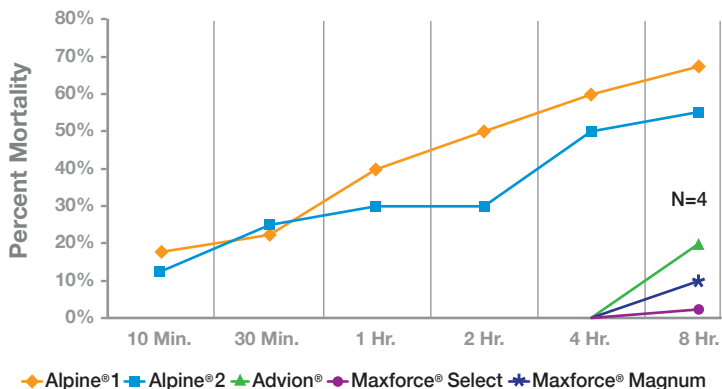

Alpine® Cockroach Gel Bait Rotation 2 Reservoir
Article#: 59014068

Packaging: 1 Box (4x30 gram) Syringes

Guarantees very different food ingredients in each formulation

Fast-Acting

Efficacy of Alpine® Cockroach Gel Bait Rotation 1 & 2 Matrices Against Male German Cockroaches Orlando Normal Strain

Silverman, Jules, PhD., Trial ID #: 15HIR014. Date 12/2015

- Both **Alpine** Cockroach Gel Bait Rotation 1 & 2 Reservoirs begin killing roaches within minutes after being exposed to the bait
- Slower-acting gel baits can take hours before roaches begin to die after exposure to bait

Reduced Risk Status

Contains the active ingredient, dinotefuran, the only insecticide on the market granted Reduced Risk Status by the EPA for both public health use and food handling establishments

Rely on **Alpine** Cockroach Gel Bait Rotations 1 & 2 Reservoirs as a part of the Complete Cockroach Solution protocol from BASF.
