

INSIDE INSECTS DON'T STAND A CHANCE

- ✓ No Pesticides/Odor-Free
- ✓ Light-weight and easy to set up
- ✓ No assembly required
- ✓ Indoor use only

*Mosquito Relief
is on the way!*

The DynaTrap® DT300IN operates economically and is easy to set up. It traps insects without adding chemicals to the environment or the surrounding areas of usage.

Our award winning DynaTrap® technology uses a 3-way protection plan for insect extermination. A powerful UV emitting fluorescent bulb produces warm and bright light that attracts insects to the unit. The DynaTrap® also produces carbon dioxide, which is irresistible to mosquitos. After Insects and mosquitos are lured to the trap, the powerful fan draws them into the retaining cage where they dehydrate and die.

FEATURES

- Indoor use only
 - No expensive attractant or propane
 - Smokeless – pesticide and odor free
 - Operate 24 hours a day, 7 days a week
 - Provides up to 1250 sq. ft. coverage
 - Twist on/off feature prevents insects from escaping when cleaning
 - Easy to set up and whisper-quiet
 - 1 year warranty
 - Includes: UV bulb - approx. 3,000 hours (4 months) and 7 ft. cord (110 VAC)
- See reverse side for more information.

1250sq.ft. COVERAGE

The DT300IN has a unique twist-on/off feature that ensures the unit is completely sealed when the fan is turned off. Any insects still alive in the retaining cage won't fly away during cleaning.

Our Customers Say It Best... "This thing is amazing. It works! It catches a large variety of insects, not just pesky mosquitos." Nuncie., Sherwood, AR

Attract, trap and kill flying insects including mosquitos, biting flies, Asian beetles, wasps, hornets, yellow jackets, moths, stink bugs, no-see-ums and more!

THE SCIENCE OF DYNATRAP

UV Special UV producing light bulbs ignite a Photocatalytic Reaction between Ambient Organic Matter circulated by the internal fan over the TiO₂ Surface releasing the irresistible Insect lure of CO₂ and H₂O.

CO₂

CARBON DIOXIDE
Insects are lured into the trap by the trail of CO₂ where they are vacuumed up and trapped by the internal fan to dehydrate and die.

1 ULTRAVIOLET RAYS

The DynaTrap's special UV bulb generates warmth and UV rays, attracting flying insects night and day.

2 TITANIUM DIOXIDE COATING

The exclusive TiO₂ (Titanium Dioxide) coated surface produces CO₂ (Carbon Dioxide), irresistible to mosquitos. This occurs through a photocatalytic reaction, when UV rays hit the TiO₂ and organic matter (pulled in by the airflow from the fan) turns into CO₂ and H₂O (water vapor).

3 POWERFUL VACUUM ACTION FAN

DynaTrap's powerful, yet whisper-quiet fan draws insects into the retaining cage, where they are trapped by the vacuum action, and eventually dehydrate and die (usually within 24 hours). The retaining cage is removable, allowing the contents to be emptied into the trash.
