

MOSQUITO PROTECTION WITH A TWIST

- ✓ No Pesticides/Odor-Free
- ✓ Durable All-Weather Construction
- ✓ Light-weight and easy to set up
- ✓ Indoor/Outdoor

Mosquito Relief is on the way!

The DynaTrap® DT1050 operates economically and is easy to set-up. It traps insects without chemicals being added to the environment or the surrounding area.

Our award winning DynaTrap® technology uses a 3-way protection plan for insect extermination. A powerful UV emitting fluorescent bulb produces warm and bright light that attracts insects to the unit. The DynaTrap® also produces carbon dioxide, which is irresistible to mosquitos. After Insects and mosquitos are lured to the trap, the powerful fan draws them into the retaining cage where they dehydrate and die.

FEATURES

- Indoor/outdoor
- No expensive attractant or propane necessary
- Smokeless – pesticide and odor free
- Operate 24 hours a day, 7 days a week
- Twist on/off feature prevents insects from escaping when cleaning
- Provides up to ½ acre coverage
- Easy to set up & whisper-quiet
- Durable all weather construction
- 1 year warranty
- Includes: UV bulb - approx. 3,000 hours (4 months), cleaning brush, metal chain for hanging, 10 ft. cord (110 VAC)

See reverse side for more information.

AN ADDED TWIST

The DT1050 has a special feature that prevents insects from escaping when cleaning. The unit is completely sealed when the fan is turned off, ensuring that any insects still alive in the retaining cage cannot fly away.

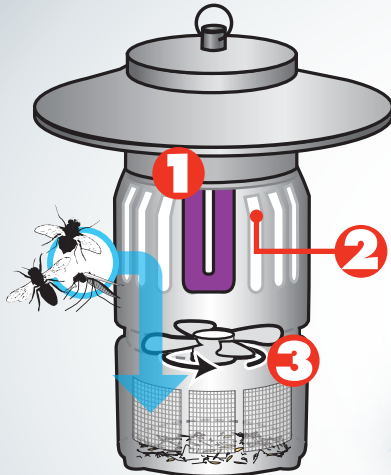

Our Customers Say It Best...

"Works wonderfully and let's us enjoy sitting outside without covering ourselves in toxic bugspray! We love our DynaTrap!" Brad M., Germantown, TN

Attract, trap and kill flying insects including mosquitos, biting flies, Asian beetles, wasps, hornets, yellow jackets, moths, stink bugs, no-see-ums and more!

THE SCIENCE OF DYNATRAP

UV Special UV producing light bulbs ignite a Photocatalytic Reaction between Ambient Organic Matter circulated by the internal fan over the TiO₂ Surface releasing the irresistible Insect lure of CO₂ and H₂O.

CO₂

CARBON DIOXIDE
Insects are lured into the trap by the trail of CO₂ where they are vacuumed up and trapped by the internal fan to dehydrate and die.

PHOTOCATALYTIC REACTION

H₂O

TiO₂ TREATED SURFACE

1 ULTRAVIOLET RAYS

The DynaTrap's special UV bulb generates warmth and UV rays, attracting flying insects night and day.

2 TITANIUM DIOXIDE COATING

The exclusive TiO₂ (Titanium Dioxide) coated surface produces CO₂ (Carbon Dioxide), irresistible to mosquitos. This occurs through a photocatalytic reaction, when UV rays hit the TiO₂ and organic matter (pulled in by the airflow from the fan) turns into CO₂ and H₂O (water vapor).

3 POWERFUL VACUUM ACTION FAN

DynaTrap's powerful, yet whisper-quiet fan draws insects into the retaining cage, where they are trapped by the vacuum action, and eventually dehydrate and die (usually within 24 hours). The retaining cage is removable, allowing the contents to be emptied into the trash.
