BREAK LISTED PEST LIFE CYCLES IN SENSITIVE AREAS WITH ZOËCON®

The Gentrol® lineup of products connects you with control of German cockroaches, fruit flies, drain flies, and stored product pests. Formulated with (S)-hydroprene, these products break listed insect life cycles and provide residual control even in sensitive areas like food handling establishments. This unique combination of strength and sensitivity is available in aerosol, concentrate, and device options to allow pest management professionals the most flexibility with treatment protocols and to partner these IGRs with insecticidal products when needed.

Gentrol® Complete Aerosol

- (S)-Hydroprene 0.36%
- Lambda-Cyhalothrin 0.05%

Gentrol Point Source® Roach Control Device

- (S)-Hydroprene 90.6%

ABOUT THE ACTIVE INGREDIENT - (S)-HYDROPRENE

All Gentrol® products are formulated with (S)-hydroprene, an Insect Growth Regulator that controls insects by interfering with normal development. This mode of action provides IGR control to prevent the growth and/or maturation of labeled pests.

FEATURES

- Provides continuous German cockroach, fruit and drain fly and bed bug control for up to four months
- Translocates deep into wall cavities, cracks and crevices
- Approved for use in food handling areas

BENEFITS

- Compatible partner to a wide variety of insecticides or baiting programs
- (S)-Hydroprene breaks listed insect life cycles to prevent rebound infestations
- One of the most trusted IGR brands on the market
