

Xcluder™ Door Bottom Seals

Rodent Proof Door Bottom Seals

for Commercial and Residential Applications

Reduce maintenance costs and improve health and safety regulatory compliance with Xcluder™ Door Bottom Seals.

The soft seals on overhead and roll-up doors provide little resistance to rats and mice and are one of the most common rodent entry points.

Xcluder™ Door Seals feature our patented Xcluder™ fill fabric providing an easy to install barrier that is virtually impenetrable to rodents. The durable outer gasket ensures a lasting, dependable weatherseal saving you money on heating and cooling expenses.

Garage Doors

Overhead Doors

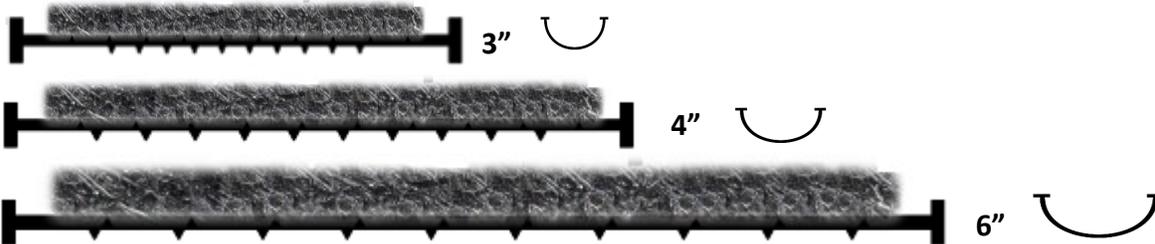

Roll-up Doors

Inner core of Xcluder™ fill fabric provides protection against gnawing rodents and is laminated to a durable outer gasket made of black EPDM synthetic rubber which is excellent in all temperature conditions (-50° – 350°F).

Designed with a 1/4" "T" to fit the popular T-style bottom retainers. (Retainers sold separately see pg. 2)

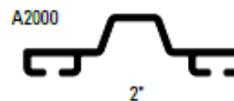

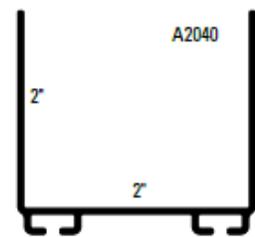

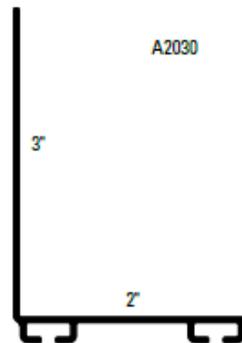

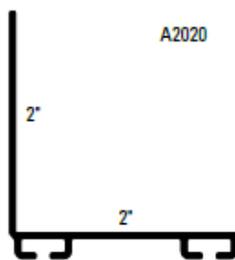

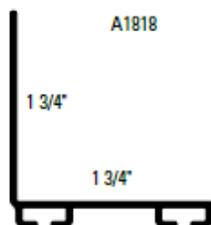

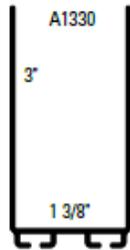

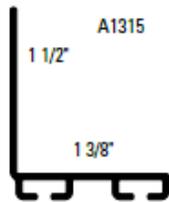

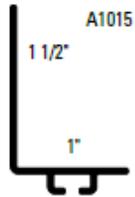

Item	Width	Length
162653	3"	75' roll. Custom lengths from 10' - 75'
162654	4"	75' roll. Custom lengths from 10' - 75'
