

Dragnet[®] SFR Termiticide/Insecticide

EPA REG. NO. 279-3062

SLN No. MS-970008

FOR DISTRIBUTION AND USE ONLY WITHIN MISSISSIPPI

Clarification of Directions for Use for Pre and Post Construction Termite Treatment.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This label must be in the possession of the user at the time of pesticide application.

Before using this product, read and carefully observe directions and precautionary statements and other information appearing on the EPA registered product label.

Pest: Subterranean Termites

Clarification of “Pre Construction” Directions for Use

The directions for use for Dragnet SFR under the heading Pre Construction Subterranean Termite Treatment are amended as follows:

Horizontal Barriers

If the fill is washed gravel or other coarse material, it is important that 2 gallons of dilution per 10 square feet be used to reach the soil substrate beneath the coarse fill.

Clarification of “Post Construction” Directions for Use

The directions for use for Dragnet SFR under the heading Post Construction Subterranean Termite Treatment are amended as follows:

Application Volume

Where desirable for post construction treatments, the volume of the 1.0% emulsion may be reduced by 1/2 the labeled volume for vertical barriers only. For all post construction treatments no less than 1/2 gallon of emulsion per 10 square feet may be applied. Volume adjustments at 2.0% are not recommended for subslab injection. **See volume adjustment chart.**

Important

This supplemental labeling contains directions for use of this product which do not appear on the product label. Follow instructions carefully. Read and carefully observe the precautionary statements and all other information appearing on the product label. This label must be in the possession of the user at the time of application.
