

THE PREMIER SOLAR-POWERED BIRD DETERRENT

Kness Avian Away™ is a wind-propelled bird deterrent that utilizes solar-powered LED lights that effectively scares birds away. The patent-pending multi-angled reflective fins flash light while spinning, confusing pest-birds and causing them to leave the area.

LED lights beam onto the spinning fins at night, making the Kness Avian Away™ a must have for 24/7 pest prevention.

Kness Avian Away™

SOLAR BIRD DETERRENT : INSTRUCTIONS

For best results, use in an area with applicable winds and plenty of sun. Use the 4 preformed holes to anchor to surface or use the included PVC pipe attachment kit to mount, giving you plenty of options for best placement.

✓ Unique Design

- Two multi-angled opposing spinning reflectors.
- Two reflective colors for a more effective deterrent.
- Simple and easy to use.

✓ Solar Powered

- LED lights last all night and charge all day.
- No need for power hookup.

✓ Dual Mounting Options

- Anchor to surface with screws (*anchoring screws not included*).
- Use PVC pipe attachment kit (*kit screws included*).

✓ Built-in LED lights

- Lights switch on in dark to continue reflecting light, keeping birds from roosting.

* Does not include base anchoring screws

PRO GRADE PERFORMANCE

Durable polystyrene construction. Easy to clean and user friendly.
