

MasterLine®

Introducing MasterLine Polymer Transport System

Features:

- Migrates and redistributes the active ingredients in the presence of moisture; humidity, dew, and rain
- Rearranges on leaf to maintain coverage as leaf grows
- Encapsulates chemicals in micelles to keep it on the leaf
- Allows slow release of chemicals to provide longer term effectiveness
- Contains adhesive properties and insures more thorough target coverage
- Remains on the leaf longer in the presence of moisture (rain-fastness) reducing run off
- Exhibits both hydrophilic and hydrophobic properties in a controlled ratio
- Sticks to the plant longer than oil and may allow for extended spray intervals
- Inherently provides minimal insulation to help resist burning and freezing
- Slows down the decay process of food when applied on a post-harvest basis
- Strong polymer structure in spray solution encapsulates the insecticide to slow drying process and allowing better distribution
- Works well with hose reel sprayers, backpack sprayers, and mist blowers as well as other commonly used application equipment

Available in two sizes:

831768 - 1 Qt. Jug
831773 - 1 Gal. Jug
