THINLINE® Trap
A sturdy long-life, high intensity system for monitoring beetles and moths when using the COMBI lure.

MICRoDOT™ Trap
A reduced amplitude, precision controlled release system for monitoring local populations of beetles and moths. A sturdy multi-species tuned trap.

WB PROBE II® Trap
The fastest, easiest and most cost-effective insect trap for monitoring crawling insects at all levels of grain mass. A sturdy, long-lasting, perforated plastic design for easy insertion into grain mass.

THE DOME™ Trap
A high-quality, global standard for monitoring red and confused flour and other beetles. The DOME now features a new injection-molded trap, and a new kairomone, resulting in overall improvements of 35 percent to the trap's capture rate.

ReBAIT™ Kit
Replacement pheromone lures and kairomone attractant for the DOME trap system.
