

BORA-CARE[®] with MOLD-CARE[®]

Bora-Care with Mold-Care kills existing mold and helps prevent future mold and wood decay fungi growth. It's used during new construction to treat all the wood in a structure, providing long-term residual protection against:

- mold
- decay fungi
- drywood termites
- general pest infestations

Wood is the most expensive component in a home. The period during new construction offers a rare opportunity to protect it because all the wood is available for treatment.

Bora-Care with Mold-Care is also heavily used to kill mold and help prevent mold growth after flooding or heavy rain events.

UNTREATED

TREATED

Nisus Corporation specifically advises all parties that mold will eventually grow in conducive conditions. Since Nisus Corporation cannot control such conducive conditions, Nisus Corporation shall not be liable for any liabilities, claims, damages or the like in any way related to or arising in connection with the occurrence or presence of mold. For more information as well as additional warranties and disclaimers, see the product label, the *Mold and Fungi Technical Bulletin* or www.nisuscorp.com.
