

Fahrenheit™

On your course and around the clubhouse

Fahrenheit™ is a 38% water soluble granule herbicide for the control of broadleaf and grassy weeds in labeled warm-season turfgrasses. Can be applied in spring, summer and fall with temperatures above 50 degrees. Fahrenheit's easy to use formulation produces visible activity in 7-10 days.

Formulation: Water dispersible granule

Active Ingredients

Metsulfuron-Methyl, Dicamba

Use sites

Residential & commercial lawns, golf courses, sports fields, parks, municipalities, sod farms

Packaging

6 ounce bottle

Mode of action

Group 2 herbicide: metsulfuron-methyl inhibits acetolactate synthase (ALS) responsible for the synthesis of essential amino acids that are necessary for plant growth.

Group 4 herbicide: dicamba is a synthetic auxin that mimics the natural plant hormone indole acetic acid (IAA) causing rapid, abnormal cell growth further leading to a blockage of phloem vascular tissue. This combination is a very effective weed control tool.

Features & Benefits

- **Profitability.** A little goes a long way. The low cost of this Dicamba + Sulfonylurea (SU) herbicide formulation provides high-performing and affordable weed control.
- **Versatility.** Safe formulation for warm season grasses means you can use Fahrenheit on your course and around your clubhouse.
- **Simplicity.** One bottle treats one acre. No more complicated dilution ratios.
- **Flexibility.** Fahrenheit produces results in temperatures as low as 50 degrees.
- **Efficacy.** Controls weeds faster with two different modes-of-action.

QUALI-PRO

Suggested Use Rates for Application

| Use Rate | oz. (per 1000 ft ²) | Grams (per 1000 ft ²) | oz. (per Acre) | Grams (per Acre) |
|----------|---------------------------------|-----------------------------------|----------------|------------------|
| Low | 0.09 | 2.5 | 4.0 | 113.0 |
| Medium* | 0.13 | 3.9 | 6.0 | 170.0 |
| High | 0.27 | 7.6 | 12.0 | 340.0 |
