

Primer Triplet[®] SF

Post-Emergent Selective Broadleaf Herbicide

Primer Triplet SF is a post-emergent broadleaf herbicide formulation of two phenoxy herbicides and dicamba that selective controls hard-to-kill broadleaf weeds in turf grass. Also for use on sod farms, around highways, rights-of-ways and other non-crop areas.

- Labeled for sod farm usage
- Combination of three powerful selective herbicides
- Effective control of a variety of broadleaf weeds
- Flexibility – higher rates for problem areas, lower rates for turf maintenance
- Ideal for cool or warm season turf
- Get the Optical Advantage[®] – MCPP-p is environmentally responsible
- Tank mix compatible with most liquid fertilizers and iron

Weeds controlled

Clover
Dandelion
Henbit
Oxalis
Plantains
Wild Onion
Other Broadleaf weeds

Active Ingredients

*2,4-D, Mecoprop-p
and dicamba*
