The end user accepts full responsibility of misuse and or abuse of this product.

**Instructions:**

Unpackage the product from box

Dust Canister: The top of canister can be twisted off in order to add the pesticide of your choosing. Drione Dust works best. Add what you deem necessary for the job. The bottom cylinder piece of the canister will twist off and is where you will find the filter . Additonal filters have been included with your product. Once the pump is attached and contents of canister is in place. Begin pumping to disperse dust to treat the targeted area.

Scraper: This attachment is intended to clean off debris from structure ,where the nest is attached.

Spray Can Attachment: Place insecticide spray can in the holder. Use the velcro to keep in place. You may adjust the height of trigger by untwisting the threaded screw and raising or lowering vertical piece. Tighten again to hold in place. The nylon string should be attached to trigger. When pole is extended, you will pull string to initiate trigger to disperse spray.

Thank you for your purchase. We appreciate your business

BuzzDuster: Diagram

Compression fitting(s): Loosen by twisting which will allow pole to telescope. Adjust accordingly to height deemed necessary for the job. Make sure to tighten fittings by twisting back into place, to lock pole in place

All attachments can be connected to the telescoping pole by making the threaded connection at the top of pole
