FMC and Fyfanon® ULV Mosquito

A New Combination for Effective Mosquito Control

 **FYFANON® ULV**
Malathion **INSECTICIDE**

FMC Corporation, a specialty company that has been serving agricultural, industrial and consumer markets globally for more than a century with innovative solutions, applications and quality products, is now marketing Fyfanon® ULV Mosquito.

Fyfanon and Resistance Management

Fyfanon is labeled for aerial and ground-application mosquito control. With malathion as its active ingredient, Fyfanon is one of the few non-pyrethroid options remaining with registration for mosquito control.

Benefits of Fyfanon:

- Plays an important role in rotational programs
- Designed to minimize the potential for development of resistance
- Preserves the limited number of products now available for mosquito control.

Consider Fyfanon ULV Mosquito as a partner in your resistance management program.

FMC's Commitment to the Mosquito Control Industry

FMC is committed to supporting various aspects of the U.S. mosquito control industry from technical studies to legislative support to helping young professionals prosper in this critically important area of public health.

We look forward to working with you and making Fyfanon ULV Mosquito an even more valuable tool.

Our Commitment to Fyfanon

Malathion has been an important tool for mosquito control in the U.S., Canada and around the world for 60 years. We at FMC are already investing in malathion to ensure its continued availability and further enhance its value to mosquito control professionals.

Areas of work include:

- Field studies researching:
 - Application rates utilizing the latest application and monitoring technology
 - Droplet size and dispersion
 - Formulation improvements
- Resistance monitoring
